

Salty ST Alfalfa with Microbes RX™

Varietal tolerance with planter box microbes designed to amend saline soil.

Alfalfa

Product Description

Salty ST is a salt tolerant brand alfalfa. It is productive in both saline and highly productive soils. Adding soil correcting microbes for high saline soils from Microbes RX™, gives producer extra advantage in tough to grow areas. Salty ST is protected by a broad base of disease resistance.

Features

- Salt tolerant
- Good forage yields in both saline and highly productive soils
- Solid disease resistance package

Agronomic Characteristics

Winter Survival..... 1.8
Recovery After Harvest Average
DRI 30/30
Fall Dormancy..... 4.0
Saline Soil..... Tolerant
Crown Placement..... Average
Root Type Tap
Multi-leaf Expression..... Medium
Forage Yield..... Very Good
Forage Quality Very Good

Disease and Pest Resistance

Bacterial Wilt	
Verticillium Wilt	
Fusarium Wilt	
Anthracnose	
Phytophthora Root Rot	
Aphanomyces Race 1	
	S LR MR R HR

S = Susceptible Resistance, LR = Low Resistance
MR = Moderate Resistance, R = Resistant
HR = High Resistance
